WE BUILD A BETTER WORLD THROUGH INNOVATIVE AND SUSTAINABLE SOLUTIONS
WE ARE FLUOR CORPORATION
HELPING BUSINESSES GROW, ECONOMIES THRIVE AND COMMUNITIES FLOURISH

A global leader in engineering, procurement, fabrication, construction and maintenance, Fluor works closely with governments and companies to design, build and maintain complex capital projects that are the essential building blocks of development and progress. We have the expertise, reach and financial strength to tackle the world’s toughest challenges with a comprehensive life-cycle approach that delivers projects on time, within budget and with an outstanding health, safety and environmental record.

Our clients transform the energy that powers industries. They mine the raw materials that drive economies. They build the highways and rail lines that connect communities. They develop new pharmaceuticals to help fight disease. They conduct missions that keep nations safe. And they do it all backed by the expertise and ingenuity of Fluor. We build a better world.

WE LEAD THE INDUSTRY
PIONEERING PERFORMANCE AND PROJECT EXCELLENCE

Driven by our core values of safety, integrity, teamwork and excellence, Fluor has long been a leader in the global construction industry and is ranked No. 181 on the FORTUNE 500® 2020 list. Every day, we set the standard for safety and sustainability, ethical performance, operational excellence and industry innovation, providing clients and partners the confidence that only a global leader can deliver.

We partner with government agencies to support their missions and build-out infrastructure around the world. We work hand-in-hand with leading advanced manufacturers and life science innovators. We manage and provide operations and maintenance services for some of the world’s most complex projects for major energy, chemicals, power and mining companies.

WE BUILD VALUE
DELIVERING CERTAINTY AND CONFIDENCE

Fluor designs, constructs and maintains projects around the globe that positively impact our clients’ businesses and our communities. We have more than 45,000 employees in over 60 countries, working on over 1,000 projects around the world at any one time. Our integrated approach spans all phases of design, engineering, procurement, fabrication, construction and maintenance. We leverage our supply chain advantages by using a global procurement network and in-country suppliers.

Together, we’re able to meet the requirements of today’s global clients – from innovative delivery and cost certainty to capital efficiency and project safety. With Fluor, it’s all possible.

PROVIDING COMPREHENSIVE SERVICES

WE WORK SAFELY AND SUSTAINABLY
CARING FOR THE WELL-BEING OF THE ENTIRE COMMUNITY

Our robust health, safety and environmental (HSE) practices are driven by our uncompromising commitment to safety. At Fluor, safety drives the actions of every employee at every location, every day. Our people deserve it. Our clients demand it. Our performance depends on it. With ongoing investment and innovation, Fluor works to create a transparent, proactive, caring culture that is essential to the success of projects and the well-being of those who work on them.

Sustainability at Fluor means meeting the needs of our clients while conducting business in a socially, economically and environmentally responsible manner. It’s why we have been recognized by the Ethisphere® Institute as one of the World’s Most Ethical Companies® for 14 consecutive years. With a strong track record of employee volunteerism and philanthropy, our employees make a positive impact at our offices and project sites around the world.

PODCAST
"ENR's Fluor Leader talks about the company's approach to safety and sustainability and the氟光列的 promising role it can play for communities and the planet"
ENERGY & CHEMICALS
INNOVATING SOLUTIONS THAT DRIVE GROWTH

Fluor is one of a few global companies that can comprehensively deliver large and complex projects for global oil and gas production and processing clients – serving the upstream, downstream and integrated petrochemical markets. Projects include EPC services for chemicals, liquefied natural gas, carbon capture, onshore and offshore facilities, renewable fuels and biofuels facilities, pipelines, refineries, terminals and utilities and offsites, as well as technology processing expertise. We’re an essential partner in the production of safer, cleaner, accessible and renewable energy solutions that spur regional economies and drive human prosperity.

MINING & METALS
EXTRACTING THE RAW MATERIALS THAT MAKE THE WORLD WORK

Fluor has the proven execution platform and local presence to support mining clients around the world. Our mining and metals experience extends across alumina and bauxite, coal, copper, diamonds, gold, iron ore, lithium, mineral sands, uranium and other metals. Fluor serves the fertilizer industry and also provides complete life-cycle services in the downstream metals market. Collectively, these mining and metals projects are essential to driving local economic growth and producing the core resources used for household, industrial and agricultural applications around the world.

INFRASTRUCTURE & POWER
CONNECTING CITIES, COUNTRIES AND COMMUNITIES

Fluor is an industry leader in developing large, complex infrastructure projects for commercial and government clients worldwide. Our leadership and extensive experience in developing public-private partnerships provide high-value solutions for bridges, highways, rail and transit systems and toll roads. Infrastructure and power projects also include heavy civil works, ports and marine terminals and renewable energy. Each day millions of people travel to work quickly, get home to their families safely and deliver commerce reliably thanks to the work of Fluor’s project teams.

ADVANCED TECHNOLOGIES & LIFE SCIENCES
DELIVERING THE BUILDING BLOCKS OF HEALTH, SAFETY AND PROSPERITY

Fluor delivers advanced technologies and life sciences projects in complex environments where exacting specifications and predictable speed to market are essential to business success. Our markets include biotechnology, pharmaceuticals, advanced materials, data centers, semiconductors, smart batteries, animal health, and medical devices. Fluor has perfected the fast-track, design-build execution and validation approach, reducing the duration of a traditional project schedule. Across a client’s capital life cycle from new venture start-up, R&D laboratory and first-of-a-kind commercialization, to fully integrated manufacturing with FDA-licensed facilities, Fluor helps clients enhance quality of life around the world.
DIVERSIFIED SERVICES
DELIVERING ASSET LIFE-CYCLE EFFICIENCIES

Fluor, through its AMECO®, Stork and TRS Staffing Solutions® companies, offers clients flexible and value-added solutions to their operational needs to further improve capital returns. Together, we support each stage of a project phase, from feasibility to construction, commissioning and turnarounds, to operations and maintenance. Our comprehensive approach addresses equipment, tools and fleet services, engineering and plant performance expertise and qualified staffing resources tailored to meet each client’s need.

GOVERNMENT
KEEPING POPULATIONS SAFE AND SECURE

For more than 70 years, Fluor has served U.S. and international government agencies and the intelligence community, executing challenging projects by providing highly dependable, reliable and ethical solutions for the most demanding missions in the defense, intelligence and nuclear and civil sectors. Our teams offer the safe operation of nuclear facilities and the completion of nuclear remediation and waste disposal. We provide rapid response and emergency recovery solutions to nations ravaged by natural disasters, addressing the immediate needs of endangered communities. We provide base engineering and construction, base operations, contingency operations, emergency response and life support services to U.S. government agencies and the intelligence community.

WE MAKE A DIFFERENCE
CONTINUING A TRADITION OF COMMUNITY SERVICE

While Fluor’s core business centers on designing, constructing and maintaining complex and challenging projects, serving the communities in which Fluor employees live and work is our privilege. Last year, employees volunteered more than 37,000 hours to help enrich the lives of those in their communities through Fluor’s focus areas of education, public health and critical human needs, economic development and the environment. Fluor and the Fluor Foundation contributed more than US$7 million in financial support to community initiatives and programs in 2019.

WE INVEST IN INNOVATION
USING TECHNOLOGY TO MOVE THE INDUSTRY FORWARD

We help our clients solve challenges by embracing opportunity, developing innovative ideas and deploying leading-edge technology. We utilize data-driven processes to realize efficiencies and deliver cost and schedule certainty. Our award-winning knowledge management system gives our employees 24/7 access to a repository and forum to address and solve problems. Our proprietary Zero Base Execution™ process allows us to simplify design for our clients and provide them with facilities that run effectively on a leaner build.
